SUMMARY

Software Engineer and full-stack developer with approximately two years of practical experience across internships, independent projects, and client engagements. Strongest in frontend development, website design and development, and full-stack delivery with React, Next.js, TypeScript, Node.js, and Supabase. Designed, built, and deployed a production news platform with 1,000+ published articles, a bilingual English/Arabic client website, and an AI code explainer using the Gemini API. Works independently, communicates clearly, and takes ownership from problem definition through deployment.

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend:** React, Next.js (App Router), Tailwind CSS, responsive design, bilingual RTL/LTR interfaces, form validation
- **Backend & Databases:** Node.js, Supabase, PostgreSQL, REST APIs, authentication, Row Level Security, Next.js middleware
- **AI Integration:** Google Gemini API, Claude Code, prompt engineering
- **Performance & SEO:** Sharp, progressive JPEG, Lighthouse, JSON-LD structured data, XML sitemaps, RSS
- **Tools & Deployment:** Git, GitHub, Vercel, Vitest, Cursor
- **NIIT coursework:** Java, SQL, MongoDB, React Native, Spring Boot, Thymeleaf

PROJECTS

WestBridge News — Full-Stack Digital News Platform Independent project | Flagship

Live: westbridgenews.com | GitHub: github.com/hafidhdark-cmyk/West-Bridge-Network

- Designed, built, and deployed the full platform independently: a production news site with 1,000+ published articles, shared to a WhatsApp community of 100+ members.
- **Solved WhatsApp preview failures** caused by oversized social-card images by architecting a dynamic generation engine in Node.js and Sharp, with dual-photo composition and brand watermarking.
- **Cut each social card** from about 1.5MB to 127KB with progressive MozJPEG compression, and reduced reported generation time from about 1.5 seconds to under 80ms. Verified by sharing real articles to the WhatsApp community.
- Built a custom editorial admin with authentication, media handling, client-side image compression, and subdomain routing through Next.js middleware.
- Implemented Supabase PostgreSQL storage, real-time comments, and article view counts, plus SEO metadata, XML sitemaps, RSS feeds, and JSON-LD structured data.
- **Stack:** Next.js 14, React 18, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Sharp, Vercel.

CodeSense — AI Code Explainer FlyRank internship capstone | Independent project

Live: codesense-chi.vercel.app | GitHub: github.com/hafidhdark-cmyk/CodeSense

- Built an app that explains code in any programming language, with beginner-friendly or technical explanations.
- Integrated the Google Gemini API through a server-side REST route (POST /api/explain) that keeps the API key out of the browser, and added session history and input validation.
- Implemented a model fallback that retries a backup model when the primary returns HTTP 503 or 429.
- Scored 99 Performance, 95 Accessibility, 100 Best Practices, and 100 SEO in Lighthouse, and wrote two passing Vitest tests.
- **Stack:** Next.js 15, TypeScript, Tailwind CSS v4, Gemini API, Vitest, Vercel.

Darul-Hifdh — Client Website Independent client project

Live: darul-hifdh.vercel.app | GitHub: github.com/hafidhdark-cmyk/darul-hifdh-website

- Designed and developed the full website independently for an online Islamic institution.
- Built student and teacher application flows with form validation and WhatsApp-based submission.
- Implemented bilingual English and Arabic interfaces with RTL/LTR support, interactive components, and responsive layouts.
- **Stack:** Next.js 15, React 19, TypeScript 5, Tailwind CSS v4, Vercel.

Slotly — Booking Platform Co-Founder and Co-Developer | Team of two
Live: Slotly (hosted on Bolt) | GitHub: github.com/hafidhdark-cmyk/Slotly

- Co-built a booking platform that helps barbers, nail artists, and hairstylists manage their bookings.
- Developed the frontend and backend, designed the PostgreSQL database architecture, and implemented authentication.
- **Stack:** React 18, TypeScript, Vite, React Router, Tailwind CSS, PostgreSQL (Bolt Database) with Row Level Security, Deno Edge Functions, Gemini API.

Chuks Kitchen — Internship Deliverable Trueminds Innovations
Live: hafidhdark-cmyk.github.io/Chuks-Kitchen | GitHub: github.com/hafidhdark-cmyk/Chuks-Kitchen

- Built a responsive restaurant web app with menu browsing, category filtering, and table reservations in HTML, CSS, and JavaScript, as an individual internship deliverable.

EXPERIENCE

Front-end AI Engineering Intern — FlyRank July 2026 — Present | Remote

- Delivered frontend assignments with AI as a pair-programmer: wrote specifications, reviewed generated code, tested it, and documented results.
- Configured Claude Code CLI, Cursor, Git, Conventional Commits, and a CLAUDE.md conventions file.
- Compared vague and detailed prompts on the same form, documented the gaps (no live character count, uppercase emails accepted, no tests), and turned them into project rules.
- Built CodeSense as the capstone, and designed AI-assisted workflows and a Job Application Tracker Agent with five evaluation cases and human-approval guardrails.

Frontend Engineer Intern — Trueminds Innovations Ltd Feb 2026 — Apr 2026 | Remote

- Developed the landing page for TalentFlow, a learning platform, as part of a team.
- Built and delivered Chuks Kitchen as an individual internship deliverable.

EDUCATION

Full Stack Software Developer Program — NIIT, Nigeria Semester 3 of 4 | In progress
Four-semester program covering full-stack development, from fundamentals to enterprise backend with Spring Boot.

Bachelor of Science, Computer Science — University of the People Currently enrolled

CERTIFICATIONS

Azure AI Fundamentals (AI-900) Microsoft Elevate · Digital Skills Nigeria | April 2026

Frontend Developer Internship Certificate Trueminds Innovations Ltd, Cohort One | April 2026 | ID: INT-CERT-CAR216417189338

Global Gig Work Mastery Jobberman · Mastercard Foundation · Propel | December 2025

ADDITIONAL

- Strengths: problem-solving, communication, and ownership of work from idea to deployed software.
- Documents projects publicly on LinkedIn and X.
- Languages: English (Professional), Yoruba (Native).
